

The Angelina Jolie Effect -

A public event to explore how breast cancer runs in families

Thursday 3rd April 2014, 6-8pm

Hadyn Ellis Building, Maindy Road, Cathays, Cardiff CF24 4HQ

Why does cancer run in families?

What's my risk?

What are BRCA genes?

Is surgery the answer?

Should I be tested?

Would I want to know?

What options are there?

Join us at this interactive event to explore the genetics of breast cancer and what it may mean for you. Clinicians and researchers will talk through the current clinical and research situation and a cancer survivor will share their story and experiences. There will also be time for discussion and questions with our experts.

Tea/coffee will be served from 5.30pm

This event is **free of charge** but you **must** register to attend at www.eventbrite.co.uk

(search for 'Angelina Jolie')
